

При заказе произвольных размеров детали необходимо пользоваться числом "К" - коэффициент пропорции сторон, $K=B/C$
 Если вам не подходит стандартный размер профиля, то расчет по Вашим значениям будет производиться так:

На примере венчающего карниза ВК01(рис1):
 Необходимая сторона $B=320\text{мм}$, тогда $C=B/K$
 $C=320/1,38=232\text{мм}$
 Необходимая сторона $C=115\text{мм}$, тогда $B=K \cdot C$
 $B=1,38 \cdot 115=159\text{мм}$
